

# FormEntry Workflow

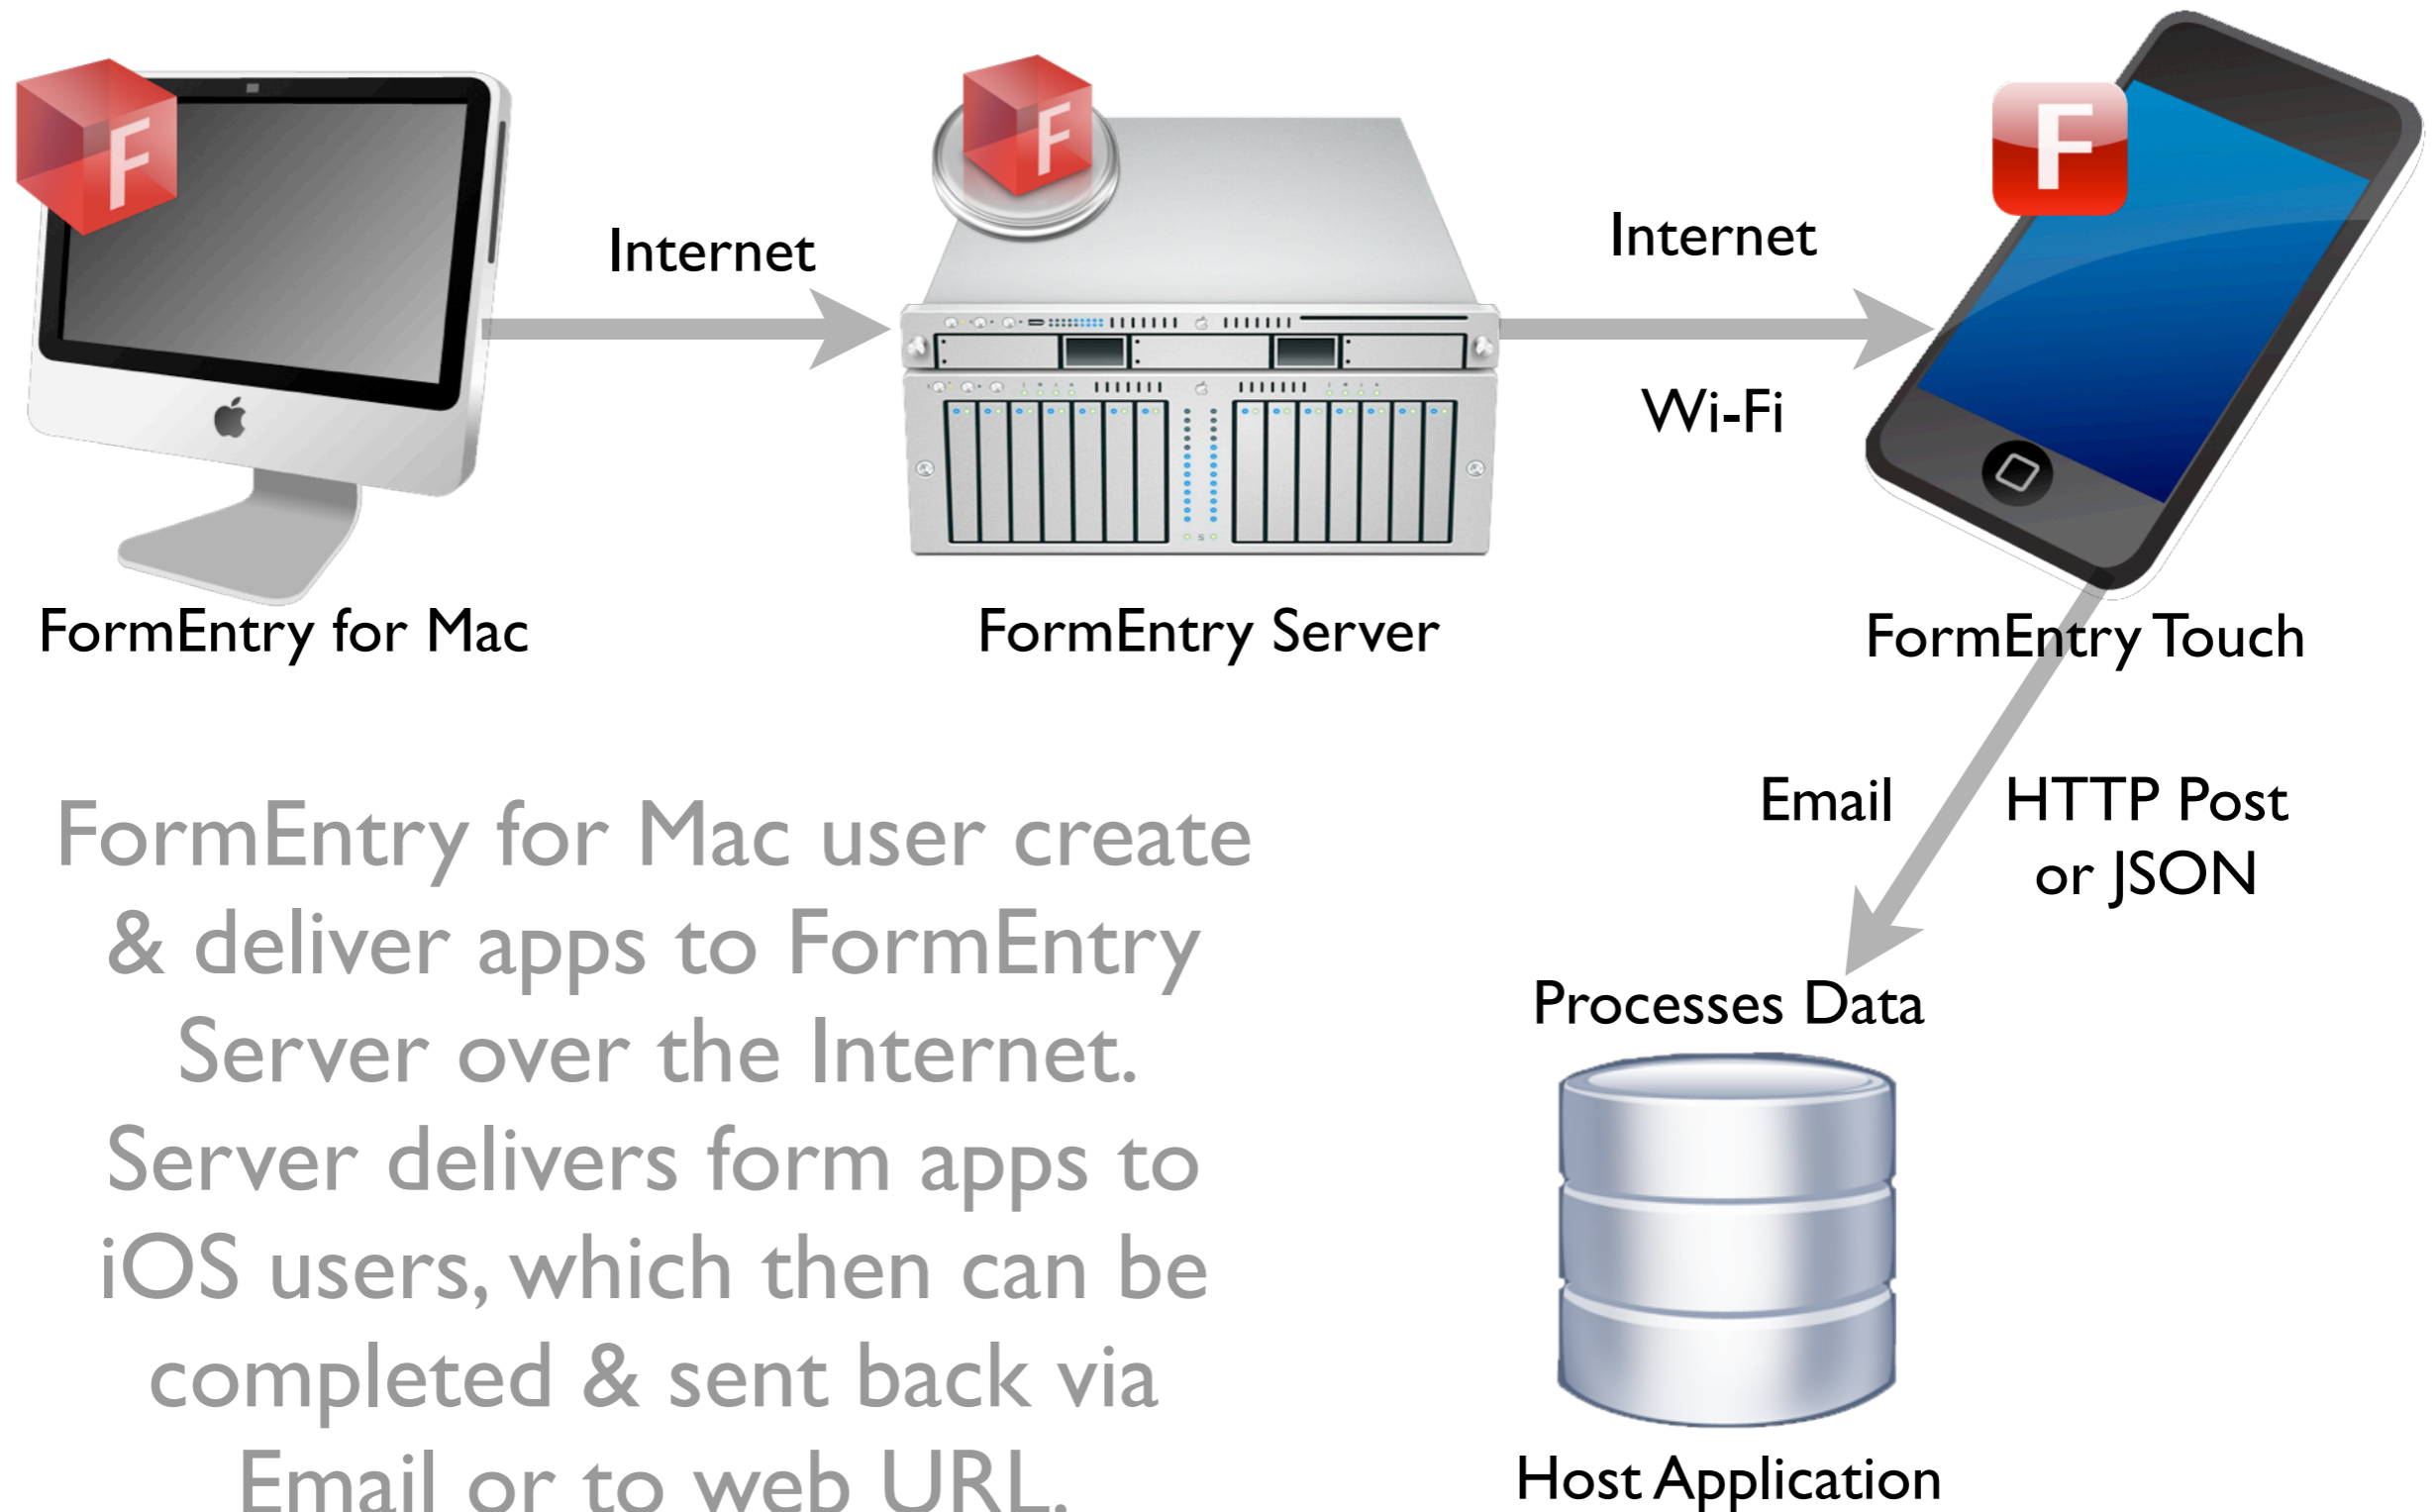

The distribution of form based apps on iOS devices.

# Common Workflow

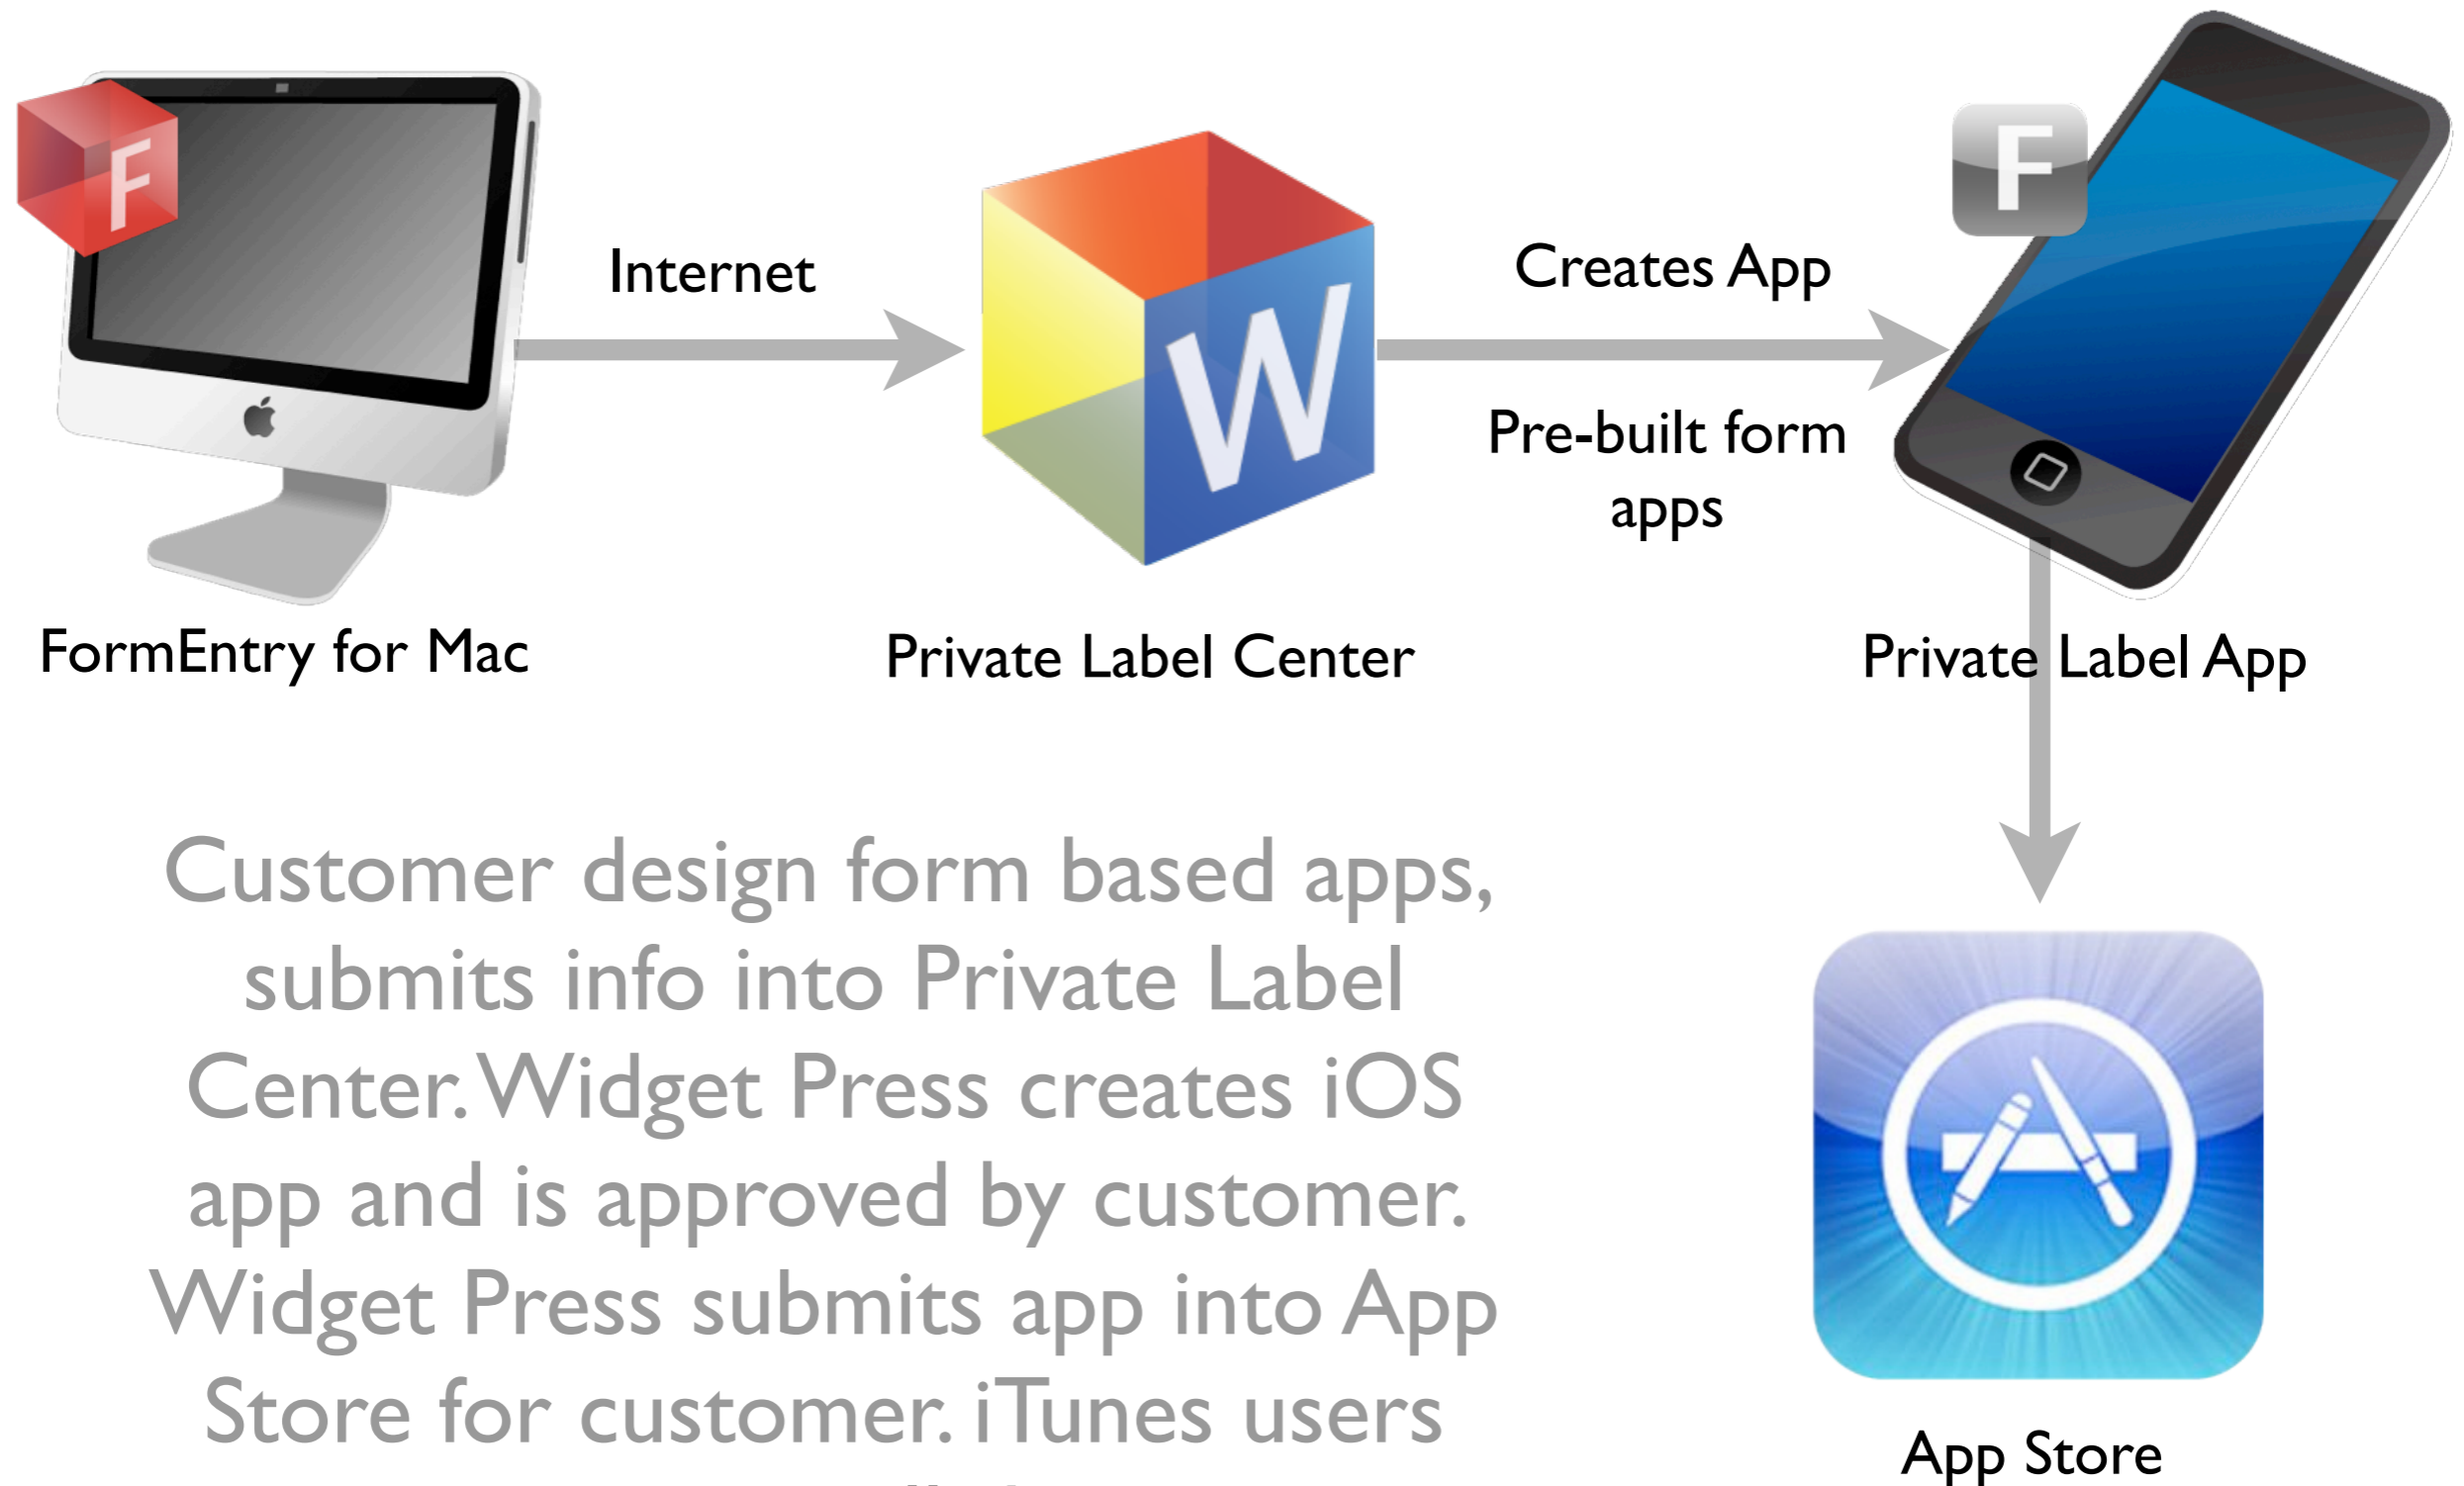

FormEntry for Mac user create & deliver apps to FormEntry Touch over a local Wi-Fi network. iOS users can then send the completed forms back via Email or to web URL.

# Advanced Workflow

FormEntry for Mac user create & deliver apps to FormEntry Server over the Internet. Server delivers form apps to iOS users, which then can be completed & sent back via Email or to web URL.

# Private Label Workflow

Customer design form based apps, submits info into Private Label Center. Widget Press creates iOS app and is approved by customer. Widget Press submits app into App Store for customer. iTunes users now can install the app.
